

# ISWA BEACON CONFERENCE: FOOD WASTE

---

April 8 | 2019 | 9AM  
Radisson Blu Scandinavia Holbergsgate 30  
Oslo, Norway

# Programme April 8 2019

## ISWA BEACON CONFERENCE FRAMEWORK LEGISLATION AND PRACTICAL EXPERIENCES FOR DIVERTING ORGANIC WASTE IN CITIES AND SITE VISIT

---

For the first time, the ISWA Beacon Conference on Food Waste will align with the Nordic Biogas Conference and Composting Day, organised by Avfall Norge (Waste Management Norway) for a week of events bringing together the foremost international expertise in food waste. Learn from city experiences in Milan, Sao Paulo, San Francisco and Oslo and discuss the latest updates on organic waste, composting and biogas worldwide.

The Beacon Conference on Food Waste features the leading American expert and advocate for Californians Against Waste, **Mr Matt Cotton, USA, as Key Note speaker**, showcasing inspiring projects for collection and recycling of organic waste from the city of San Francisco. California is the leading state for organics recycling policies and practices in the states. Urban organic waste collection is possible, affordable and effective - learn more from leading thinkers of the International Solid Waste Association including Marco Ricci-Jürgensen of the Italian Composting and Biogas Consortium, Italy, Ingunn Dale Samseth, REN, Norway; Gabriela Otero, ABRELPE, from the mega city of Sao Paulo, Brazil and Stefanie Siebert, European Compost Network, Germany. The conference moderator is Jane Gilbert, UK, Carbon Clarity and ISWA Vice-Chair of the Working Group on Biological Treatment of Waste.

As the European Green Capital for 2019, Oslo is the perfect location. The City is recognised as a sector leader for biogas from food waste, including the production of liquified biogas for heavy vehicles. The Beacon Conference includes a technical site visit to Optibag biogas plant facility, with a reception in the City Hall and Conference Dinner.

See registration page for details and fees: ISWA Members enjoy a 20% discount!
